

# CIARO MAX LINE

Digital Signage  
System

■ simply integrate

CIARO – it's consistent design is a perfect solution for the demands of digital signage environments.

## CIARO DISPLAYS

Display modules of highest quality

Currently the CIARO series is available in the display sizes 26" and 40". Industry panels are used, which guarantee a high quality, aesthetically attractive display with an extensive operating life time.

The main focus of CIARO is the maximum functionality in public areas. The series is optimized for the use in portrait mode and designed to be wall mounted. For security, as standard the CIARO is supplied with integrated SIFLEX® safety glass and theft protection. All connections are internally secured, with only LAN and power having external cables.

Green IT: compared with conventional solutions of display and PC the CIARO reduce power by upto 50%. Thereby the use of fans is reduced and CIARO is kindly silent.

## CIARO IQ MODUL

the intelligent display drive system

The CIARO IQ function module offers all preferences of a modern computer system. The integration of modern PC components within the IQ unit ensure that no external drive electronics are necessary.

Low Power consumption is ensured by the use of power saving Intel® Mobile technology.

The principle: As efficient as possible, as powerful as necessary.

## OPTIONS

CIARO can be adjusted to the requirements of single customers.

Logo and branding can be printed on back of glass. Additionally YOUR corporate design can be illuminated from inside by the use of LEDs.
